Town Engineer
Forest Street
Acton, Mass.

Re: Proposed Water Mains

Dear Mr. Condon:

Enclosed herewith are Applications for Permits to install water mains in Brook Street and Nagog Hill Road. We are applying at this time so that we will have these permits for our Chapter 131 hearing with the Conservation Commission later this month.

We respectfully request that after the contract for this work has been awarded, the Permittee be changed from the Water District to the successful contractor. In addition, since the contractor will provide the Water District with a 100 per cent Payment Bond and Performance Bond and the Water District retains 5 per cent of the contract price for one year after acceptance, we respectfully request that the usual bond be waived.

If you have any questions on these applications, please feel free to contact this office.

Very truly yours,

DUFRESNE-HENRY ENGINEERING CORP.

George R. Allan, P.E.

cc: Board of Water Commissioners
Mr. Charles E. Orcutt
